

Permanent Makeup Certificate

Program Title: Permanent Makeup Program

Program Credential: Certificate

Program Duration: 4 day

Class Schedule: 9:00 am to 5:00 pm

Program overview

When we think about makeup we think about the substance of makeup - the products; the colour, texture, maybe even the packaging. Makeup goes ON the skin. Permanent makeup, however, is a cosmetic technique or a process that involves placing pigment INTO the skin. This technique uses what we all know as “tattoos” (permanent pigmentation of the skin) in a way that creates designs that LOOK like makeup. Well-known examples include eye-liner and other permanent enhancing colours to the skin of the face, lips, and eyelids. Some methods of permanent makeup include recreating or restoring artificial or hyper-realistic eyebrows, particularly in people who have lost them as a consequence of old age, disease, such as alopecia total is, chemotherapy, or a genetic disturbance, and to disguise scars and white spots in the skin such as in vitiligo. It is also used to restore or enhance the breast’s areola, such as after breast surgery.

Career Opportunities

With today’s fast-growing beauty industry and demand for aesthetic services, students will receive hands-on training and gain knowledge in all phases of medical aesthetics. The program will provide information and guidance about career opportunities, seeking and obtaining employment. After completing the program, students will be eligible to start employment in medical spas, doctor offices or self-businesses. Chellsey Institute of Beauty & Health supports students from enrollment to graduation to ensure successful completion

Permanent Make-up Training outline
